How does this look?

The Wood River drainage is always a bit difficult to characterize. Now you've essentially the entire flow into the Nushagak and Kvichak Bays.

Let me know if you would like a jpeg or other file format.

Hello Marcus:

After getting some feedback from Phil North with EPA and further discussion with Ann, we think it would be good to include the Wood River basin with acreages as well. If you have any questions, please let me know. Thanks.

Mike

Ann and Phil and Michael

Here is a draft basemap with the drainages and subbasins highlighted.

If this looks fine, I can send it as a jpeg or whatever format you like and you can drop into a document to add page numbers, titles, etc.
